ENENTO MCP SERVER – BETA TERMS

Terms of Use – Finland (Pilot Version)

Effective date: [date] | Version: Pilot 0.1 | Provider: Suomen Asiakastieto Oy

1. Purpose and nature of the pilot

These Terms of Use ("Terms") govern access to and use of a limited, experimental pilot version of the Enento Model Context Protocol server operated by Suomen Asiakastieto Oy ("Asiakastieto", "we", "us"), including its tools, endpoints and documentation (the "MCP Server"). The MCP Server allows an approved AI client, such as Claude, operated by a third-party AI provider, to request and use a limited set of business information data made available by Asiakastieto ("Pilot Data"). The pilot is offered for learning and evaluation purposes only. Its purpose is to allow selected pilot customers to test the MCP Server with a limited set of business information data, so that Asiakastieto can observe real usage patterns, gather feedback from customers. The pilot is not a commercial product launch. By connecting to or using the MCP Server, you accept these Terms. If you act on behalf of an organisation, you confirm that you have the authority to bind that organisation. These Terms apply only to the pilot described here and do not extend, replace, or otherwise affect any separate agreement you may have with Asiakastieto or another Enento group company for other services.

2. Access arrangements; no billing or production use

The pilot does not involve customer registration, user accounts, billing, service packaging, or production onboarding. Access is granted individually to selected pilot participants at Asiakastieto's discretion by issuing personal access credentials (such as an API key). Access is temporary and revocable, and may be limited to specific users, prompts, sessions or time windows that Asiakastieto determines. The pilot is not intended for, and must not be used for, live business decision-making, production workflows, or any process on which you or any third party will materially rely.

3. Pilot Data made available

"Pilot Data" means selected business information (BI) API data relating to legal entities, such as trade register (kaupparekisteri) details, structural filings and financial information, made available by Asiakastieto through the MCP Server for the purposes of the pilot. Asiakastieto has designed the pilot so that Pilot Data does not include direct personal identifiers: it does not include personal identity numbers (henkilötunnus), named individuals such as company officers, signatories or beneficial owners, or any individual taxation or income data. However, certain Pilot Data may constitute personal data under applicable data protection law, for example where a sole trader's (toiminimi) registered business name identifies a natural person. In addition, Asiakastieto processes limited personal data relating to pilot participants, such as contact details, access credentials, log data and usage data, for the purposes of administering, securing, and improving the pilot (see section 9). If you become aware that Output appears to contain personal data beyond the categories described above, you must not rely on it and should report it to Asiakastieto promptly using the contact details in section 12. You must treat any information that may identify a natural person with appropriate care and must not use the MCP Server to seek out, extract or compile information about identifiable individuals.

4. Right to use

Subject to these Terms, Asiakastieto grants you a limited, non-exclusive, non-transferable and revocable right, for the duration of the pilot only, to connect an approved AI client to the MCP Server and to use the Pilot Data made available to you for the sole purpose of evaluating the pilot internally. You may not resell, sublicense, redistribute, or otherwise make the MCP Server or Pilot Data available to any third party, and you may not use Pilot Data, the MCP Server or Output to build or support any product, service or process outside the pilot. Each request you make must correspond to your own distinct query. You must not store, cache, aggregate or redistribute Pilot Data in bulk, and must not use Pilot Data or Output to train, fine-tune or improve any AI model.

5. Your responsibilities

You are responsible for your own use of the MCP Server, including your choice of AI client, its configuration, your users, the prompts and instructions given, and any reliance placed on the resulting output ("Output"). You must not enter personal data of any kind into prompts submitted through the MCP Server, including names, personal identity numbers, or other identifying information about yourself or third parties. You must review and independently verify any Output before making any reference to or use of it and must not use Output as the sole basis for any decision concerning a natural person or a business relationship. You must keep any access credentials confidential, use the MCP Server only for the evaluation purposes described in section 1, and comply with applicable law at all times.

6. Restricted use

You must not, and must not allow anyone else to: (a) use the MCP Server or Pilot Data unlawfully or in a way that infringes another person's rights; (b) attempt to identify, single out or profile a natural person using the MCP Server; (c)

scrape, bulk-extract or systematically compile Pilot Data beyond what ordinary evaluation of individual queries requires; (d) circumvent access controls, usage limits or other technical safeguards; (e) probe, attack, disrupt or overload the MCP Server, or submit malware or prompt-injection content; or (f) share access credentials with anyone who is not an authorised pilot participant.

7. No warranty

The MCP Server and the Pilot Data are provided strictly on an "as is" and "as available" basis, without any warranty of any kind, whether express or implied, including as to accuracy, completeness, availability, fitness for a particular purpose, or non-infringement. Asiakastieto does not warrant that the pilot will be uninterrupted, error-free, or secure, and may suspend, modify, or discontinue the pilot, in whole or in part, at any time and without notice, as this is an early-stage experimental service. AI clients, including Claude, operate probabilistically. Output may be inaccurate, incomplete, outdated or misleading. Asiakastieto does not control, endorse or take responsibility for Output generated by an AI client, and Output does not constitute legal, financial, credit, compliance or other professional advice.

8. Limitation of liability

To the maximum extent permitted by applicable Finnish law, Asiakastieto's total liability arising out of or in connection with the pilot, however arising, is excluded. Without limiting the foregoing, Asiakastieto is not liable for any indirect, incidental, special or consequential loss, or for loss of profit, revenue, business, goodwill, anticipated savings, or data, arising out of or in connection with the pilot, the MCP Server, the Pilot Data or the Output, even if Asiakastieto has been advised of the possibility of such loss. If, despite the foregoing, Asiakastieto is found liable to you under mandatory Finnish law, Asiakastieto's aggregate liability in connection with the pilot is limited to EUR 1,000. This limitation does not apply to liability that cannot be limited under mandatory Finnish law, or to loss caused by Asiakastieto's intent or gross negligence. You are solely responsible for any decision or action you take on the basis of Output, and you agree to indemnify Asiakastieto against any claim by a third party arising from your use of the MCP Server or Output in breach of these Terms.

9. Data protection

Asiakastieto has designed the pilot so that Pilot Data does not include direct personal identifiers. However, as noted in section 3, certain Pilot Data (such as a sole trader's business name) may constitute personal data under applicable data protection law. In addition, Asiakastieto collects and processes limited personal data relating to pilot participants — including contact details, access credentials, log data and usage data — for the purposes of administering, securing, monitoring and improving the pilot. Asiakastieto processes such personal data as a controller in accordance with applicable data protection law and its privacy notice, which is available at [link to privacy notice]. When you connect an AI client, such as Claude, you instruct Asiakastieto to make the requested Pilot Data available to that AI client and its underlying AI provider (for example, Anthropic). The AI provider processes any information submitted to it, including your prompts, under its own terms and privacy practices, for which Asiakastieto has no responsibility. You are responsible for ensuring that you do not submit personal data, confidential information, or other regulated data through your prompts.

10. Confidentiality and feedback

You must keep confidential about any non-public information about the pilot, the MCP Server, or its underlying technology that Asiakastieto shares with you, and must not disclose it to third parties without Asiakastieto's prior written consent. If you provide feedback or suggestions about the pilot, Asiakastieto may use them freely to improve its products and services, without any obligation to you.

11. Suspension, termination and changes

Asiakastieto may suspend or terminate your access to the pilot, or the pilot as a whole, at any time and without notice or liability, including where Asiakastieto believes this is necessary for security, legal, or operational reasons, or where Asiakastieto decides not to continue the pilot. On termination, you must stop using the MCP Server and delete any access credentials. Sections 7, 8, 9, 10, 13 and 14 survive termination. Asiakastieto may update these Terms at any time during the pilot. Continued use of the MCP Server after an update constitutes acceptance of the updated Terms.

12. Contact

Questions about the pilot: Luca.Koskinen@asiakastieto.fi . To report suspected misuse or unexpected personal data in Output: luca.koskinen@asiakastieto.fi .

ENENTO MCP SERVER – BETA TERMS

Terms of Use – Finland (Pilot Version)

Effective date: [date] | Version: Pilot 0.1 | Provider: Suomen Asiakastieto Oy

13. Governing law and disputes

These Terms are governed by the laws of Finland, excluding its conflict-of-laws rules. Any dispute arising out of or in connection with these Terms or the pilot shall be finally settled by the Helsinki District Court (Helsingin käräjäoikeus) as the court of first instance.

14. Entire agreement for the pilot

These Terms constitute the entire agreement between you and Asiakastieto regarding the pilot and supersede any prior discussions or understandings regarding the pilot. These Terms do not apply to, and do not modify, any other agreement you may have with Asiakastieto or another Enento group company.
