

Value should not be estimated – it should be measured

Real data on the value of a company helps you make good decisions.

Suomen Asiakastieto Oy's Value Report provides a euro-denominated value for companies. The written report presents and examines the key ratios, calculation tables and most recent financial statements in detail. The clear graphics accompanying the numeric values aid in the interpretation of the report. The Value Report is a cost-effective, neutral tool for evaluating the success of operations, defining the value needed for generational shifts in the company, planning corporate acquisitions and evaluating interesting targets for investment, among other applications.

The report is compiled by analysing and refining information from our large, up-to-date business database. Ordering the Value Report is quick and easy.

The Value Report is needed for the following situations, among others:

- Corporate acquisitions or sales
- Generational shifts
- Monitoring business development
- Increasing the efficiency of the company's operations
- Budgeting
- Evaluating the results of one's work
